

## CLI - Remove Specific Windows Update using DISM

Get a list of all packages	<b>dism /online /get-packages /format:table</b>
Choose a package from the list and use the get-package-info command to verify you have the right package.	<pre>dism /online /get-packageinfo /packagename: &lt;PackageName&gt;</pre> <p>Example: <code>dism /online /get-packageinfo /packagename:Package_for_KB4058702~31bf3856ad364e35~amd64~~16299.188.1.0</code></p>
Remove the package	<pre>dism /Online /Remove-Package /PackageName: &lt;PackageName&gt;</pre> <p><code>dism /Online /Remove-Package /PackageName:Package_for_KB4058702~31bf3856ad364e35~amd64~~16299.188.1.0</code></p>

**REMEMBER:** *This must be run from an elevated command prompt.*
